[SEC=OFFICIAL]

Dear Ms Francis,

Thank you for the belated reply below to my letter of 2 February 2021 concerning the impending rollout of the Pfizer COVID-19 vaccine.

As no issue has been taken with the factual claims in my letter, I can only surmise that the Department accepts those claims. Indeed, as noted, many of the claims pertaining to the unsafe nature of the vaccine appear in the TGA's own documentation.

Considering that the inherent dangers of this nostrum far outweigh the risks of the disease, and in light of the numerous reports of seriously bad reactions occurring overseas, I question the sufficiency of the response to the submissions as to the urgent need to communicate elevated warnings to a vulnerable Australian public.

I would therefore appreciate clarification as to any action the Minister intends to take to address these critical safety issues, failing which my client can only infer that the Minister is prepared to guide the public towards vaccine-induced death, convulsions, paralysis, anaphylaxis, palsy and immune dysfunction (to name a few).

Kind regards,

**Benedict S. Clemens**
